& RV hard water specialists

EVAPORATIVE COOLERS

IS YOUR EVAPORATIVE COOLER CONSTANTLY BREAKING DOWN?

Installing a Swampy conditioner in the recirculating loop of your evaporative cooler means every time the water is recirculated through the pump it is getting treated.

If summer means constantly cleaning out scale, waiting for another breakdown or costly maintenance bills for your evaporative cooler – you need to change things – FAST!

Hard water is the biggest cause of premature wear and malfunction on evaporative coolers and it will eventually become your worst nightmare.

There is a solution that's easier than you'd imagine – Swampy Conditioners will ensure you eliminate hard water dramas with your evaporative cooler once and for all.

BENEFITS OF A SOFTERWATER CONDITIONER – EVAP

- Significantly increase the working life of your evaporative air conditioner
- Increase performance and energy efficiency
- Reduce maintenance
- Enjoy the cool
- Save costly break down call outs and expenses
